Retro Post®

The Flexible Rubber sign post that replaces traditional steel posts

Features & Benefits of the Retro Post

- Constructed using a 'high grade' rubber compound and RPS' unique patented technology.
- Flexible and 'self returning' - fully recovers from impacts
- Can use traditional sign brackets or sign can be directly mounted to post with screws.
- Provides 24 hours per day **continuous guidance**/direction.
- Reduces costs** associated with the continuous replacement of traditional steel hardware.

Replacement cost post only

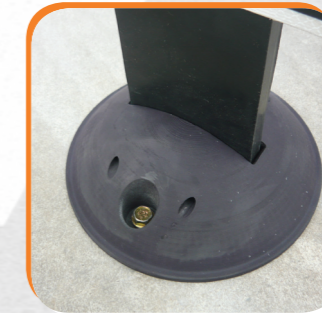

- Quick and **easy system to install**
- Withstands multiple vehicle impacts**
- Reduces damage to vehicles**
- Eliminates potential injuries** to roadside installation crews
- Can be **used with existing street sign hardware.**
